PRICE INTERPRETERS OF EL PASO War Savings Stamps Will Buy The Shells - By Cesare

When this committee unfertness its tank which, by the way, is a moneyless and almost thankless one, there was some public suspiction born of years of experience with steadily meanting food prices. There were these who be lieved the committee's assions were to be in reality trade conferences at which agreements were to be made for elevating prices. This feeling periasted even after some reductions had been scheduled. Doubtless this was merely reflections had been scheduled. Barely is there any change in prices of prime nocessities, such as sugar, lard, compounds, bears, bread and flour substitutes, while there are processed in must have become evident to anyone who has given the matter some attention, that food prices here have become well stabilized. Rarely is there any change in prices of prime nocessities, such as sugar, lard, compounds, bears, bread and flour substitutes, while there are prices and who remember that a little more than a year ago. El Passans were paying 25 cents for five pounds of potatoes can better appreciate the work of the committee in recommending such prices that people now get to ser if points of potatoes for the same sum. Prices of quite a number of things are as low as a year ago, and this in wartime when millions of tons of foodstuffs are being experted and when the tendency in 1916 and in 1817 before Hoover tone had to the food administration, was to boost prices clear through the roof.

Reference to Hoover tone had been to administration.

Reference to Hoover tone had been to administration.

Reference to Hoover tone had been to a price of the source.

Look Over The Southwest on the agent that and the interior franking neut and south with reference to their reclamation to making surveys of arid and flood lands in the interior franking in the future by returned soldiers of the unit of the first state. This is a

and this in wartune when minions of two closedary in 1916 and in 1817 hefere Houver took hold of the food administration, was to boost prices clear through the roof.

Reference to Hoover brings us back to the source.
Hechest C. Hoover is the mainspring of the price stabilization. He has not been able to do as much as most people would have liked in the way of reducing prices through pressure as dealers by means of the license, which he has done a great dead in the way of reducing prices through pressure as dealers by means of the license, which he has done a great dead in the way of reducing prices through pressure as dealers by means of the license, which he has done a great dead in the early and the license, which he has done a great dead in the early and the license, which he has done a great dead in the early and the license, which he has done a great dead in the regulation of the deal committee, of which the price interpreting, committee the state fined administrators and their suggestion are passed on to the local tood administrators and their suggestion are passed on the local food administrators and their suggestion are passed on the local condition has suffilled his duries up to the present with commendable centry and entire justice.

But strong as that influence may be, it would be do little practical relief to the community unless the local committee were sheerely endeavoring to hold prices down.

There are trichs in all trades and plenty of tricks whereby an uncomplete medical committee were sheerely endeavoring to hold prices down.

There are trichs in all trades and plenty of tricks whereby an uncomplete medical and state administrators. And at sight everyone likes to see the pyratechnic display.

But a chain is no of the matchinal and state administrators and the save money which can be used to help an uncomplete medical and state administrators. As minimum, and the process of the committee of the proc

such items as butter, condensed milk, and potatoes.

The attitude of the merchants is the more creditable in view of the fact that the price interpreting committee is in no sense a price fixing committee. It suggests but the German god being Saian.

EL PASOANS should not forget to recognize the good cannot order. It has no authority by which it can assess

FL PASOANS should not forget to recognise the good work being done for the benefit of the whole public by the price interpreting committee of the federal food administration for Texas. It has done its best to keep prices the consumer pays for food down to the lowest mark and to figure profits for dealers down to fair margins which preclands exorbitant figures.

The committee is reprisentative of the wholesale and retail trade and of the consuming public and its membership comprises James A. Dick, chairman; Frank S. Ainsa J. B. Walson, F. S. Stein, George G. Franklin, C. H. Gimbel, Mrs. W. M. James, Mrs. R. J. Tighe, L. J. Chapman, J. C. Peyton, W. S. Crombie, W. H. Loertz, J. W. Lorentsen Alien C. Staples, Perry P. Young, Clifford A. Perions.

Its work is to establish wholesale prices, figure the margin of profit allowed to retailers and publish both fair wholesale and fair retail prices. The prices have to be revised frequently, either upward or downward, Gepending on supply and demand and on trade conditions merchants are swept into the margin of profit allowed to retailers and publish both fair wholesale and fair retail prices. The prices have to be revised frequently, either upward or downward, Gepending on supply and demand and on trade conditions merchants are swept into the current. Profiteering is as catching as measles, He who sees another making more makey than either of them had expected to make, teels tempted to take the same course and make exerbitant profits, too. It is this diseasee which had expected to make teels tempted to take the same course and make exerbitant profits, too. It is this diseasee which had expected to make teels tempted to take the same course and make exerbitant profits, too. It is this disease which had expected to make teels tempted to take the same course and make exerbitant profits, too. It is this disease which had prices it is decided upon.

We're learning how to save the shilling, and when the armies crass their drilling, the lesson will abide; our hard-earned scade we won't be blowing; the tail no longer will be going to biliteen with the hide. In praceful times I failed to pickle the useful dime and belpful nickel, I put no coin in brine; I wasted money as I earned it, with fooliab energy I burned it, the spendthrift's course was mine. Then came the war, and thrifty neighbors who'd caved the products of their labors, the crisis calmly met; they had their bundles in their cellars, while I and other giddy fellers were plunged neck deep in debt. We were a bunch of also-wases; we couldn't help the Red Cross causes, or buy a haby beind; we craidn't line up with the loyal, and help to can the madman royal, for all our goods were powed. The busted man is pretty nucleus when war is raging, endless, truceless, and coin is in demand, when every gent should have his deliar to help to make the forman heller, and save his native hand. And I delt skamed, and I was blushing, when I beheld my neighbors runhing with coin to boust the flag; I was for all my spendthrift folly, my soul was steeped in melanchedy, my spune began to sag. But now my wisdom teeth have aprouted, along the paths of thrift I've sconted. I've salted down four bones; my parkage doubtless will be greater, and as it grows 'fwill balk the traiter, and shake the typents' thrones. Tyrants' thrones.
